

VENLA ALISA PAA NILA

GRAPHIC DESIGNER
& WEB DEVELOPER

SKILLS

- By education I'm a programmer, but drawing and arts in general have always been close to my heart, hence I started doing graphic design.
- Because of my coding background, I feel that I'm ideal for Web design and vice versa.
- I love working in a group and bringing up ideas and planning with the group.
- I'm also used to working alone, and I'm capable of coming up with my own ideas.
